

## Introduction

The iVvy - MYOB integration is designed to allow clients to synchronise invoices, contacts, payments and refunds between the iVvy and MYOB systems. The extension gives users the ability to break down cost centres for events, and syncs all paid invoices from iVvy into MYOB.

## How it works

---

Synchronise  
invoices, contacts,  
payments &  
refunds

---

## Key features

- One way synchronisation of iVvy data into MYOB.
- Invoices held within the iVvy system will sync into MYOB.
- Users have the ability to sync iVvy contacts into MYOB Card Files (Customers).
- Once synced with MYOB, all line items on an iVvy invoice will correspond with the income account the client has chosen in the settings/configuration.
- iVvy Events Software users can view iVvy events in the Jobs section of MYOB.
- Users have the ability to create MYOB invoices assigned to a customer and job or event.
